

EARTH MUSIC THEATER LIVE

with **STEVE THOMAS'** GUITARSCAPES AND FOLKTALES AND FUSIONS

EARTH MOVIES BY ASSOCIATION OF SPACE EXPLORERS 

QUOTES

"Earth Music Theater Live conveys the beauty and fragility of our planet by merging stunning images from the International Space Station (ISS) with a sublime musical performance. It speaks to the current moment with a sense of both awe and urgency."

Salman Hameed

*Charles Taylor Chair and Professor of Integrated Science & Humanities
Hampshire College, MA, USA*

"...Thomas and his group performed improvisational "guitarscapes" incorporating ambient, fusion, baroque, jazz and country to accompany the trip. A cool detail was there was an indicator where over the Earth you were at any given time. The aurora images were unbelievable...I've never imagined what it would be like to float over aurora australis or borealis."

Chuck Dube'

NEPM broadcast engineer

"I felt reconnected to the Earth."

Kimberly Stuart

Easthampton, MA

"Very impressive movie, music and model of the ISS."

Rob Wilson

Hatfield, MA

"It was quite breathtaking, I have not stopped thinking about it! I want to share it with so many people! The combination of the music and visuals just mind altering!"

Jean Ann

Northampton, MA

"...a really outstanding evening! It was spectacular to see the earth from space and have the accompanying band. Carl's flutes added beautiful inflections which spoke to the experience of being lifted, both physically and metaphorically high above the earth."

Pamela and Larry

"Quite an experience and hard to put into words"

D. Anderson

Northampton, MA
